PROFILE

I am a detail-oriented professional with exceptional interpersonal abilities and a strong aptitude for team leadership. My passion for education is complemented by a natural talent to comprehend and teach complex information. In 2016, I certificied as a Carpentries' instructor, a pivotal milestone that has empowered me to enhance my data science proficiency by teaching fundamental computational skills at volunteer workshops.

My academic journey culminated in the completion of a Ph.D. in Environmental Sciences with a focus on genetics, followed by a post-doctoral fellowship at the Centre of Excellence for Pharmaceutical Sciences (Pharmacén) at the North-West University. I have also demonstrated my adaptability by providing tailored data science training to a diverse array of audiences, including those in linguistics, biological sciences, investment management, and the medical industry.

In recognition of my expertise, I was certified as an instructor trainer for The Carpentries in 2020, a role that entails training new instructors in pedagogical techniques. My contributions to the field have been further acknowledged through my appointment as a co-chair of the CODATA-RDA Schools of Research Data Science Working Group. This role involves instructing a comprehensive range of data science skills, encompassing Open Science principles, research data management and curation, utilization of various data platforms and infrastructures, large-scale analysis, and advanced visualization and modeling techniques. My involvement in this initiative underscores my exceptional project management and coordination proficiencies, ensuring the successful delivery of these educational programs.
